FAQ

Common Questions

Why are the homes at Vista View Resort so reasonably priced?

The homesites at Vista View Resort are used and occupied on a very long term exclusive lot agreement. The cost of the land is not included in the cost of the home. Buyers at Vista View Resort do not incur the high upfront cost of including the outlay for the land in the purchase price of the home. Residents instead pay the developer a monthly resort fee for the use of the land, the rate being similar in cost to association fees at other resorts. This resort payment covers all attributable to the use, operation and maintenance of the resort as well as the payment of the property taxes for a site-built home. In January of 2100, the property is transferred free of encumbrance to the homeowner.

Will the resort fee ever increase?

Vista View Resort guarantees that annual adjustments to the leasehold rate will not exceed the greater of 4.5% or the government's annual Consumer Price Index (CPI) for western urban areas, all customers, owner's equivalent of rent. Without some justified increases, Vista View Resort would not be able to keep up with the cost of inflation or other unexpected increases to the operating costs and expenses of maintaining your beautiful resort.

Will I have to pay a homeowners association fee too?

No, there is no homeowners association. The resort fee payment covers the exclusive use of the land plus maintenance and repair of all common areas, roads, community center, recreation facilities, and gated security.

What happens to the exclusive lot use agreement if I sell my home?

Your home can be sold at any time. The Buyer will need to enter into a new exclusive lot use agreement and meet all age requirements.

What are the advantages of land lease contracts?

The most significant advantages of a land lease is that the purchase price is almost always much less than that for a home bought in the traditional manner. Not buying the land saves money. This enables you to purchase a higher quality home in a more expensive residential area than you might otherwise be able to do. Also, because you don't own the land it is the Resorts responsibility to pay property taxes.
